

Getting Started With Your LearnDevNow Learning

LearnDevNow provides practical online learning videos for Microsoft developers worldwide. Our learning libraries feature self-paced training videos by for Visual Studio, SQL Server, SharePoint and more -- allowing busy developers to learn from Microsoft experts whenever and wherever it fits their schedule.

These Learning Roadmaps will help you understand how the courses relate to each other and what order you may wish to complete the training based on your current knowledge.

Table of Contents

Review the following roadmaps to get an understanding of what order you may choose to take specific courses within each technology.

- Microsoft SharePoint Roadmap pg 2
- Microsoft SQL Server Roadmap pg 3
- Microsoft Visual Basic Web Developer Roadmap pg 4
- Microsoft Visual Basic Windows Developer Roadmap pg 5
- Microsoft Visual C# Web Developer Roadmap pg 6
- Microsoft Visual C# Windows Developer Roadmap pg 7

“When I paid less than \$100 for a years subscription to your training videos, I wasn’t expecting much. What I actually got was access to thousands of dollars worth of training. I’m amazed at the value of your LearnDevNow library and every time I start a new course, I can’t believe it’s included and that I don’t need to pay extra. So far I have completed over 100 hours worth of training videos - and I’m just getting going! The training is easy to follow and encompasses training for beginners as well as experts. Thanks again for the amazing product.”

—Daniel Gochin, Regality Software

Microsoft® SharePoint® Roadmap

LEVEL 100

This course assumes a basic level of familiarity with Microsoft Office and Internet Explorer. Developers may elect to skip this course.

SharePoint 2010 for Business Users

SharePoint 2007 for Business Users

LEVEL 200

These courses are designed for individuals with a working understanding of SharePoint, ASP.NET 2.0, and Visual Studio 2008 tools.

SharePoint 2010 for Developers

SharePoint 2007 for Administrators

SharePoint 2010 for Administrators

SharePoint 2007 for Developers

LEVEL 300

These courses are designed for individuals using Microsoft Office and SharePoint who are implementing some of their advanced features.

SharePoint 2010: Web Content Management

SharePoint 2007: Web Content Management

SharePoint 2010: Business Processes

SharePoint 2007: Business Processes

SharePoint 2007: Portals and Search

EXPLORING

This course is designed to provide an executive preview of new technologies and help individuals with experience in prior versions prepare to be productive as soon as possible. Concepts covered in this course have been integrated into some of the courses listed above.

Exploring SharePoint 2010

Exploring SharePoint Server 2007

Microsoft® SQL Server® Roadmap

LEVEL 100

This course is designed for individuals with a solid understanding of relational databases.

SQL Server 2008: Installing, Querying and Security **SQL Server 2000**

SQL Server 2005

LEVEL 200

This course is designed for individuals with a solid understanding of relational databases and assumes a basic level of familiarity with Microsoft SQL Server 2008. No particular programming experience is required, but the course is taught from a developer's perspective.

SQL Server 2008 for Developers

SQL Server 2005: Additional Topics

LEVEL 300

These courses are designed for individuals that have working experience with SQL Server 2008, basic relational database concepts, and data transformation services.

SQL Server 2008 Analysis Services

SQL Server 2005 Analysis Services

SQL Server 2008 Integration Services

SQL Server 2005 Integration Services

SQL Server 2008 Reporting Services

SQL Server 2005 Reporting Services

EXPLORING

This course is designed to provide an executive preview of new technologies and help individuals with experience in prior versions prepare to be productive as soon as possible. Concepts covered in this course have been integrated into some of the courses listed above.

Exploring SQL Server 2008

Exploring SQL Server 2005

Web Developer Roadmap

Microsoft® Visual Basic®

LEVEL 100

These courses are designed for individuals with a developer background who have never programmed in the .NET Framework.

Learning to Program Using Visual Basic 2010

Learning to Program Using Visual Basic 2005

Learning to Program Using Visual Basic 2008

LEVEL 200

These courses are designed for individuals with Visual Basic and Visual C# language experience who want to develop Web applications in Visual Studio.

**Developing Applications Using Visual Basic 2008:
What's New**

ASP.NET Using Visual Basic 2005

ASP.NET Using Visual Basic 2010

ASP.NET Using Visual Basic 2005 Add'l Topics

ASP.NET Using Visual Basic 2008

ASP.NET Using Visual Basic .NET 2003

LEVEL 300

After the Level 200 ASP.NET courses, individuals can choose to go on to these more specialized courses which can be taken in any order.

**ASP.NET 4.0 AJAX and jQuery Using
Visual Basic 2010**

**Windows Workflow Foundation Using
Visual Basic**

Silverlight 4 Using Visual Basic 2010

Microsoft LINQ Using Visual Basic 2008

ASP.NET MVC 2 and 3 Using Visual Basic 2010

ADO.NET Using Visual Basic 2005

**Building ASP.NET MVC 3 Applications Using
Visual Studio 2010**

ASP.NET AJAX Using Visual Basic 2005

Microsoft LINQ Using Visual Basic 2010

**Advanced .NET Framework 2.0 Using
Visual Basic 2005**

**Windows Communication Foundation (WCF)
Using Visual Basic 2008**

Building Web Services Using Visual Basic 2005

EXPLORING

These courses are designed to provide an executive preview of new technologies and help individuals with experience in prior versions prepare to be productive as soon as possible. Concepts covered in these courses have been integrated into some of the courses listed above.

Exploring Visual Studio 2010 Using Visual Basic

Introduction to Visual Studio .NET

Exploring Visual Studio 2008 Using Visual Basic

Exploring Silverlight 2

Exploring ASP.NET Using Visual Basic 2005

Exploring ASP.NET 2.0 ATLAS

Windows Developer Roadmap

Microsoft® Visual Basic®

LEVEL 100

These courses are designed for individuals with a developer background who have never programmed in the .NET Framework.

Learning to Program Using Visual Basic 2010

Learning to Program Using Visual Basic 2005

Learning to Program Using Visual Basic 2008

LEVEL 200

These courses are designed for individuals with Visual Basic and Visual C# language experience who want to develop Window applications in Visual Studio.

Developing Applications Using Visual Basic 2008: What's New

Visual Basic 2005: Developing Applications

Developing Apps Using Visual Basic 2008

Visual Basic 2005: Developing Applications Add'l Topics

Developing Apps Using Visual Basic 2008: Enterprise, Mobile, and Security

Visual Basic .NET 2003

LEVEL 300

After the Level 200 Developing Application courses, individuals can choose to go on to these more specialized courses which can be taken in any order.

Windows Presentation Foundation Using Visual Basic 2010

Windows Workflow Foundation Using Visual Basic

Developing Applications with Entity Framework 4.1

Microsoft LINQ Using Visual Basic 2010

Microsoft LINQ Using Visual Basic 2010

.NET Remoting Using Visual Basic 2005

Windows Communication Foundation (WCF) Using Visual Basic 2008

ADO.NET Using Visual Basic 2005

Advanced .NET Framework 2.0 Using Visual Basic 2005

EXPLORING

These courses are designed to provide an executive preview of new technologies and help individuals with experience in prior versions prepare to be productive as soon as possible. Concepts covered in these courses have been integrated into some of the courses listed above.

Exploring Visual Studio 2010 Using Visual Basic

Exploring Visual Basic 2005

Exploring Visual Studio 2008 Using Visual Basic

Introduction to Visual Studio .NET

Web Developer Roadmap
