

Programming C# 6, Part 01 of 12: Getting started

page 1

Meet the expert: Don Kiely is a featured instructor on many of our SQL Server and Visual Studio courses. He is a nationally recognized author, instructor, and consultant specializing in Microsoft technologies. Don has many years of teaching experience, is the author or co-author of several programming books, and has spoken at many industry conferences and user groups. In addition, Don is a consultant for a variety of companies that develop distributed applications for public and private organizations.

Prerequisites: This is an entry level course. Some amount of programming experience will be helpful and speed up your learning but you can jump right into this course at any level.

Runtime: 01:16:28

Course description: C# and the .NET Framework provide a complex set of tools and technologies for building software applications on multiple platforms. This course covers the basics of what .NET is—along with a bit of history, and where Visual Studio and C# fit into it. Don will explore a simple .NET application so that you can begin to see the structure of both C# code and .NET projects. Then he'll delve into the C# language and why it is such a compelling tool for application development.

Course outline:

Getting Started with .NET

- Introduction
- What Is .NET?
- History of .NET
- Why .NET?
- Advantages of .NET
- Summary
- What Is C#?
- History of C#
- Demo: Wikipedia
- Why Should You Use C#?
- Standard C#
- Summary

.NET Architecture

- Introduction
- .NET Architecture
- Common Language Runtime (CLR)
- Compiling a .NET Application
- Framework Base Class Library
- A Few Common Namespaces
- .NET Languages
- .NET Application: Assemblies
- What Programs Can You Create?
- Summary

Building a .NET Application

- Introduction
- Demo: Visual Studio Command Prompt
- Demo: Basic .NET Application
- Demo: .NET Application Concepts
- Demo: Method Contents
- Demo: Using Statements
- Summary

Intermediate Language

- Introduction
- Microsoft Intermediate Language
- Demo: Intermediate Language
- Summary

C# Language

- Introduction
