

Programming C# 6, Part 06 of 12: Strings, File I/O, and Data Types

page 1

Meet the expert: Don Kiely is a featured instructor on many of our SQL Server and Visual Studio courses. He is a nationally recognized author, instructor, and consultant specializing in Microsoft technologies. Don has many years of teaching experience, is the author or co-author of several programming books, and has spoken at many industry conferences and user groups. In addition, Don is a consultant for a variety of companies that develop distributed applications for public and private organizations.

Prerequisites: This course builds upon: Programming C# 6: Getting started, Your First App, Projects and Syntax and Variables and Data Types.

Runtime: 02:03:52

Course description: The .NET framework is a collection of thousands of rich objects you can use in your code, and it's one of the compelling reasons to use C#. Using .NET classes can save you a lot of work in providing basic infrastructure to your C# applications. In this course, you'll learn about some of the many classes and objects the .NET framework, as well as more sophisticated techniques for using some of its more advanced data types. In particular, you'll learn about the support the .NET framework provides for working with strings, files, and dates.

Course outline:

.NET Framework Classes

- Introduction
- Using .NET Framework Classes
- Demo: Random Numbers
- Demo: Debugging
- Getting Info about Computers
- Demo: Environment
- Demo: Instance vs. Static
- Summary

Working with XML

- Introduction
- Demo: XMLWriter
- Demo: Writing XML
- Demo: Reading XML
- Summary

File Input and Output

- Introduction
- Demo: StreamWriter
- Demo: Writing to Files
- Demo: Directories
- Demo: Debugging
- Getting Info from Drives
- Demo: DriveInfo
- Summary

Working with Strings

- Introduction
- Working with Strings
- Fields & Properties of Strings

- Demo: Strings
- Summary

Methods of String Class

- Introduction
- Demo: String Comparisons
- Demo: Searching Strings
- Demo: Editing Strings
- Demo: Leading & Trailing Space
- Demo: Extract Strings
- Summary

Formatting Strings

- Introduction
- Formatting Strings
- Demo: Formatting Strings
- Format Specifiers for Dates
- Demo: Date Format Specifiers
- Summary

Using StringBuilder

- Introduction
- Demo: Concatenating Strings
- Using the StringBuilder Class
- Demo: StringBuilder
- Demo: Insert & Replace Strings
- Summary

Working with Dates and Times

- Introduction
- Demo: Dates and Times
- System.DateTime Structure
- Demo: Now

- Demo: DateTime Methods
- Methods of DateTime
- Summary

Using TimeSpan Structure

- Introduction
- Using the TimeSpan Structure
- Demo: TimeSpan
- Demo: Calculating with TimeSpan
- Summary
