

# Microsoft Office 2007: PowerPoint

page 1

**Meet the expert:** Stuart Rosen is an instructional designer, writer, and trainer with more than 20 years of experience creating technical, procedural, sales, human relations, and academic training. He has provided training for a wide variety of software applications, including Microsoft Word, Excel, PowerPoint, Access, and Outlook, as well as applications for digital imaging and web design. Stuart has also provided training for numerous custom corporate applications.

**Runtime:** 03:27:21

**Course description:** With Microsoft Office PowerPoint 2007, you can create professional-looking slide show presentations. This version of PowerPoint includes many new features, and one of the most noteworthy changes is the Ribbon, which replaces the menus and toolbars used in earlier versions. We will show you how to use the new Ribbon as you learn to create presentations, using templates, themes and layouts. You can make your Presentations more dynamic and effective by adding images and effects. In this course we will show you how to insert clip art, photos, graphic objects, and charts, and how to add transitions and animations. You will also see how to customize Excel to suit the way you work.

## Course outline:

### Getting Started PowerPoint

- Introduction
- Opening PowerPoint
- Tour of PowerPoint
- Help Button
- PowerPoint Presentation
- Summary

### Creating Presentations

- Introduction
- Creating a Presentation
- Templates
- Slide Sorter View
