Node.JS, Part 2 of 2: Buffers and Servers

page 1

Meet the expert: James Curtis is a .NET Developer that primarily works in the UX space. He has worked on and for several large projects alongside Microsoft Consulting. James has spoken at several code camps about UX development for ASP.NET and SharePoint. He is an active participant in the development community tweeting and blogging about several topics in the UX area. James is an active consultant and is also assisting in several Start-ups contributing his UX experience.

Prerequisites: This course assumes that users have an understanding of developing applications using C#, C++, Java, and JavaScript in a Visual Studio development environment.

Runtime: 02:08:24

Course description: In this course we'll cover using Buffers in Node.js, including copying, decoding and events. We'll then move on Server Requests, building a file server, creating HTTP requests and closing out the course we'll cover how to build a web application using ExpressJS. This course is done from the perspective of a Microsoft technologies developer getting into node.js and all it has to offer.

Course outline:

Buffers

- Introduction
- Node Buffers
- Creating a Buffer
- · Demo: Buffer
- · Get and Set Bytes in a Buffer
- · Demo: Get Bytes
- · Demo: Set Bytes
- Buffer Slicing
- · Demo: Buffer Slicing
- Summary

Buffer, Copying, Decoding

- Introduction
- Buffer: Copying
- Demo: Copy
- Buffer: Decoding
- · Demo: Decoding
- Summary

Events

- Introduction
- Creating an Event Emitter
- Demo: Create an Event Emitter
- Event Emitter API
- · Demo: Event Emitter API
- Demo: Multiply Listeners
- Event Emitter Pattern
- Event Types
- · Demo: Event Types
- Summary

Server Requests

Introduction

- Building a HTTP Server
- Demo: Create HTTP Server
- HTTP Server Requests
- HTTP Server Response
- Summary

Building a File Server

- Introduction
- · Building a File Server
- Demo: Create Server
- Demo: File System
- · Demo: Nonexistent File
- Demo: System Test
- Summary

HTTP Request

- Introduction
- Creating HTTP Requests
- Demo: GET Request
- Inspecting the Response
- Demo: Another Request
- Demo: Response
- Demo: Stream Response
- Summary

Express JS

- Introduction
- · Demo: GET Request
- Demo: POST Request
- Demo: Regular Expression
- Demo: Jade
- · Demo: Passing Objects
- · Demo: Layout
- · Working with Express.js

- · Demo: Install Express.js
- · Demo: Express.is
- Summary
