# Windows 8 Using XAML, Part 03: Style Controls

page 1

**Meet the expert:** Ken Getz is a featured instructor for several of our Visual Studio courses. He is a Visual Basic and Visual C# expert and has been recognized multiple times as a Microsoft MVP. Ken is a seasoned instructor, successful consultant, and the author or co-author of several best-selling books. He is a frequent speaker at technical conferences like Tech-Ed, VSLive, and DevConnections and he has written for several of the industry's most-respected publications including Visual Studio Magazine, CoDe Magazine, and MSDN Magazine.

**Prerequisites:** This course assumes that you have at least some programming experience in one or more modern programming languages. JavaScript will be particularly easy for you to learn if you have experience with any C-style languages—including Java, C#, C++, or Visual Basic .NET would be helpful—but this is not required.

**Runtime:** 01:10:05

**Course description:** In this course you will see the controls that C# provides for creating Windows 8 applications. Then the course will demonstrate many of the Windows 8 XAML controls including layout, UI and Textblock.
