

SignalR, Part 1 of 2: Persistent Connection

page 1

Meet the expert: James Curtis is a .NET Developer that primarily works in the UX space. He has worked on and for several large projects alongside Microsoft Consulting. James has spoken at several code camps about UX development for ASP.NET and SharePoint. He is an active participant in the development community tweeting and blogging about several topics in the UX area. James is an active consultant and is also assisting in several Start-ups contributing his UX experience.

Prerequisites: This course assumes that the users have an understanding of developing web applications using HTML and ASP.NET in a Visual Studio 2010 development environment.

Runtime: 01:10:29

Course description: SignalR is a complete client-side and server-side solution with JavaScript on the client and ASP.NET on the back end. This course will get you started with SignalR and then move into Persistent Connection. You will learn about the Persistent Connection API, IConnection API and Group Management.
