# DP-203: Data Engineering in Microsoft Azure, Part 3 of 7: Batch Processing

### page 1

Meet the expert: Eshant Garg has 16 years of extensive professional experience with expertise in Database and Business Intelligence Solutions, Advanced Analytics, Design and Solution Architect, Reporting, and Cloud Computing Technologies (Azure & Database and Business Intelligence Solutions, Advanced Analytics, Design and Solution Architect, Reporting, and Cloud Computing Technologies (Azure & Database and Business Intelligence Solutions, Advanced Analytics, Design and Solution Architect, Reporting, and Cloud Computing Technologies (Azure & Database and Business Intelligence Solutions, Advanced Analytics, Design and Solution Architect, Reporting, and Cloud Computing Technologies (Azure & Database and Business Intelligence Solutions, Advanced Analytics, Design and Solution Architect, Reporting, and Cloud Computing Technologies (Azure & Database and Business Intelligence Solutions).

As a developer and architect, he has worked closely with customers, users, and colleagues to support business solutions across a variety of industries including healthcare, insurance, finance, and government ranging from small companies to fortune 500 companies.

Prerequisites: AZ-900 Azure Fundamentals is very helpful but not required. A Candidate for the exam must have strong knowledge of data processing languages such as SQL, Python, or Scala, and they need to understand parallel processing and data architecture patterns.

Runtime: 04:57:14

Course description: The DP-203 Exam is measured in Four domains: Design and implement data storage (40-45%), Design and develop data processing (25-30%), Design and implement data security (10-15%), and Monitor and optimize data storage and data processing (10-15%).

This course covers Batch Processing.

### Course outline:

### Develop Batch Process Solutions

- Introduction
- Learning Ojectives
- · What Is Data Factory
- Data Factory Within Azure Eco System
- · Create Data Factory
- Summary

### **Data Factory Continued**

- Introduction
- Components
- Pipeline And Activities
- Summary

### **Linked Service and Datasets**

- Introduction
- Linked Service And Datasets
- Integration Runtime
- Summary

### **Triggers**

- Introduction
- Data Factory Triggers
- · Copy Data Activity Wizard
- Summary

## Copy Data Activity using Author

- Introduction
- · Copy Data Activity Using Author
- User Properties
- Parameterization
- Data Flow Concept

#### Summary

### **Mapping Data Flow**

- Introduction
- Mapping Data Flow
- Wrangling Data Flow
- Summary

### **DataBricks in Azure Cloud**

- Introduction
- · What are Azure Databricks
- Demo: Overview
- Provision Databricks
- Summary

### **Mount Data Lake to Databricks**

- Introduction
- Mount Data Lake To Databricks
- Explore Analyze Clean Transform
- Summary

### **Azure DataBricks Clusters**

- Introduction
- Azure Databricks Clusters
- Azure Databricks Important Components
- Summary
