

Microsoft Office 2010: PowerPoint

page 1

Meet the expert: Stuart Rosen is an instructional designer, writer, and trainer with more than 20 years of experience creating technical, procedural, sales, human relations, and academic training. He has provided training for a wide variety of software applications, including Microsoft Word, Excel, PowerPoint, Access, and Outlook, as well as applications for digital imaging and web design. Stuart has also provided training for numerous custom corporate applications.

Prerequisites: This course assumes that students have some knowledge of working on a computer and are familiar with the Windows Vista or later operating Systems. The students should have an installed version of Microsoft Office 2010 on their computer in order to practice the techniques and steps shown in this course.

Runtime: 04:07:45

Course description: With Microsoft Office PowerPoint 2010, you can create professional-looking slide show presentations. Using the Ribbon, which replaces the menus and toolbars used in earlier versions. We will show you how to use the Ribbon as you learn to create presentations, using templates, themes and layouts. You can make your presentations more dynamic and effective by adding images and effects. In this course we will show you how to insert clip art, photos, graphic objects, and charts, how to format with slide masters, and how to add transitions and animations. You will also see how to customize PowerPoint to suit the way you work.

Course outline:

Working With PowerPoint

- Introduction
- Tour of PowerPoint
- Ribbon
- Home Tab
- Insert Tab
- Design Tab
- Transitions Tab
- Animations Tab
- Slide Show Tab
- Review Tab
