Microsoft Office 2010: Outlook

Meet the expert: Stuart Rosen is an instructional designer, writer, and trainer with more than 20 years of experience creating technical, procedural, sales, human relations, and academic training. He has provided training for a wide variety of software applications, including Microsoft Word, Excel, PowerPoint, Access, and Outlook, as well as applications for digital imaging and web design. Stuart has also provided training for numerous custom corporate applications.

Prerequisites: This course assumes that students have some knowledge of working on a computer and are familiar with the Windows Vista or later operating Systems. The students should have an installed version of Microsoft Office 2010 on their computer in order to practice the techniques and steps shown in this course.

Runtime: 03:06:47

Course description: Microsoft Office Outlook 2010 is a personal and business information manager. This version of Outlook includes many new features, including the Ribbon, which replaces the menus and toolbars used in earlier versions. We will show you the basics of sending and receiving email, as well as how to format messages, handle attachments, organize your messages, and more. You will learn how to create and manage Contacts, schedule Calendar appointments and meetings, organize Tasks, and manage information with Notes. You will also see how to customize Outlook to suit the way you work.
