

Microsoft Office 2007: Word

page 1

Meet the expert: Stuart Rosen is an instructional designer, writer, and trainer with more than 20 years of experience creating technical, procedural, sales, human relations, and academic training. He has provided training for a wide variety of software applications, including Microsoft Word, Excel, PowerPoint, Access, and Outlook, as well as applications for digital imaging and web design. Stuart has also provided training for numerous custom corporate applications.

Runtime: 02:18:57

Course description: The programs of Microsoft Office 2007 feature many changes from previous versions. One of the major differences is the Ribbon, which replaces the menus and toolbars used in those earlier versions. We will show you how to use the new Ribbon as you learn to create, edit, and enhance your Microsoft Word documents. You will also see how to customize Word, to suit the way you work. Then we go beyond the basics, to show you advanced Word 2007 features. You will see how to format documents with Styles, how to change page layouts, and how to improve your documents with graphics, templates, lists and tables.

Course outline:

Working with Word
