

# Microsoft Excel 2013, Part 1 of 5: Get Acquainted with the Environment

page 1

**Meet the expert:** LeeAnne McManus is a nationally renowned trainer, facilitator, and productivity expert who has conducted thousands of sessions over the past decade. While widely recognized for helping end-users, departments, and organizations learn how to maximize their software products, most notably Office 365 and Adobe, LeeAnne also facilitates sessions to enhance productivity and performance through soft skills development. Her professional background includes Human Resources, Operations, and Talent and Development.

**Prerequisites:** This course assumes that students are familiar with the basic use of Windows and common use of the mouse and keyboard. No prior experience with Excel is assumed.

**Runtime:** 01:54:28

**Course description:** In this course, productivity and software expert LeeAnne McManus will walk you through the features of Excel 2013. You will learn how to navigate the user interface and also how to create visually-stimulating documents from scratch or from templates.
