Microsoft Excel 2013, Part 2 of 5: Excel Basics

Meet the expert: Leeanne McManus is a nationally renowned trainer, facilitator, and productivity expert who has conducted thousands of sessions over the past decade. While widely recognized for helping end-users, departments, and organizations learn how to maximize their software products, most notably Office 365 and Adobe, Leeanne also facilitates sessions to enhance productivity and performance through soft skills development. Her professional background includes Human Resources, Operations, and Talent and Development.

Prerequisites: This course assumes that students are familiar with the basic use of Windows and common use of the mouse and keyboard. No prior experience with Excel is assumed.

Runtime: 02:05:34

Course description: New users of Excel often face challenges when it comes to selecting and formatting content. Microsoft Office expert LeeAnne McManus will demonstrate how the different tools present in Excel can be used to search for data and format it into cells, columns, rows and sheets.
