

Microsoft OneNote 365, Part 1 of 2

page 1

Meet the expert: Vicky has over 25 years of experience as a software instructor focused on specialized curriculum development, individual and group training of individuals with a diverse skill level, and software testing. She has worked exclusively within the legal environment providing instruction (classroom, one-on-one, and remote), consulting, courseware design, support, and documentation. Her expertise includes various versions of Microsoft Office products, iManage, Workshare Compare, Nuance PDF Advanced as well as various other programs.

Prerequisites: Experience with other Microsoft products will be helpful as this product shares common interface functionality but is not required.

Runtime: 01:01:14

Course description: Microsoft OneNote allows a user to create and organize Notes across multiple devices. This course focuses on: getting started with OneNote, using the Quick Access Toolbar, Notebooks and how to take Notes.
