# Python Web Programming, Part 1 of 4: Object Oriented

page 1

**Meet the expert:** Harrison Kinsley is passionate about Python.  In addition to teaching he has founded multiple business leveraging the power of Python for machine learning, data analysis and natural language processing.

**Prerequisites:** Basic Python Knowledge is necessary for this course

**Runtime:** 01:19:42

**Course description:** Python is a high level object-oriented language used on the web and especially with Big Data. In this course, you'll learn about the object-oriented nature of the language, SQLite and how to insert Dynamic Data

**Course outline:**

**Object Oriented Programming**
• Introduction
• Get Started
• OOP Part 1
• OOP Part 2
• Modules
• Modules Part2
• Summary
• Summary

**SQLite**
• Introduction
• Introduction
• SQLite Intro
• Creating Database And Table
• Inserting Data
• Summary

**Insert Dynamic Data**
• Introduction
• Inserting Dynamic Data
• Reading Data
• Limit Update Delete
• Recap
• Summary
