

React, Part 2 of 7: Intermediate React

page 1

Meet the expert: John Smilga is a Front-End Web Developer in the Los Angeles Area. John has a Bachelor's Degree in Software Development. He spends most of his time working with Javascript, CSS3, and HTML5, and he is passionate about everything related to web development. He learns from the community and loves to share with the community what he has learned. He strives to explain very complex topics in a simple manner that everyone can understand.

Prerequisites: • Basic HTML, CSS and Javascript knowledge
• ES6 is a plus

Runtime: 02:24:35

Course description: React is a Javascript library for building user interfaces. Intermediate React continues exploring React by starting off with ES6 export and import statements. Next, how to do State programming, and finish with Events.

Course outline:
