SharePoint 2013 Power User, Part 1 of 3: Introduction

Meet the expert: Adam Levithan is a senior consultant at Portal Solutions, LLC, a leading technology consulting firm that plans, designs, and deploys highly effective digital workplace solutions to connect employees and information. He is an experienced writer, instructor, and speaker, as well as a Virtual Technology Specialist (vTSP) for Microsoft, assisting in the communication and benefits of the Microsoft collaboration suite. Adam is a seasoned business strategist, SharePoint advocate, and information architect focusing his skills on designing information management and collaboration solutions. He is passionate about the capabilities of the SharePoint platform and is an advocate for customers to improve the retention and findability of information.

Prerequisites: This course assumes a basic level of familiarity with Microsoft Office 2010 or 2013 and Internet Browsers: Explorer 8+, Firefox, or Chrome.

Runtime: 01:20:31

Course description: Many technologies that support the creation if a social enterprise have been around for over 10 to 15 years. As a result a special group of users has grown accustom to taking technology into their own hands and building solutions to meet their needs. In this course we'll honor these power users by reviewing the advanced features within SharePoint 2013 that support these initiatives. We'll not only take a look how a power user can encourage peers to collaborate but how they can control navigation and manage security. In this course you will truly learn to take advantage of SharePoint's features through the utilization of metadata applied to lists and documents and how to present this information on custom pages of your own.
