# Exploring SharePoint 2016, Part 1 of 2: Features and History

## page 1

Meet the expert: Philip Wheat is an industry veteran who has been active in the computer industry for over 20 years. With experience stretching back to the beginnings of the PC era, he has remained active on the leading edges of technology, focusing on embedded systems, knowledge management, and sensor technologies. He is one of the few who has worked with SharePoint since the original beta, has built his own microprocessor, and has had robotics projects featured in the press and TV shows around the world.

Prerequisites: You should have some familiarity with programs associated with Microsoft Office. No programming or SharePoint experience is required.
