Prerequisites: knowledge of SQL, coding experience and knowledge of Microsoft tools.

Runtime: 03:03:30

Course description: Microsoft SQL Server BI transforms raw data into information businesses can use to make decisions. This course combines SQL Server Integration Services, SQL Server Analysis Services and SQL Server Reporting Services in one course with a project. This course covers: Buffer Size Tuning, Multi threading, Processing a Cube, Component Types, Architecture and Deployment and DQS.

#### Course outline:

#### SSIS: Buffer Size Tuning

- Introduction
- Buffer Size Tuning
- Increase Buffer Size
- More Complex Program
- Allocating RAM
- · Calculate Buffer Size
- Summary

#### SSIS: Multithreading

- Introduction
- · Introduction to Multithreading
- Implement Parallel Processing
- Parallelism Logic
- Partitioning in SQL
- Partition Script
- Summary

## SSAS: Processing a Cube

- Introduction
- Manual Processing
- XMLA Query
- SQL Server Agent
- Debugging XMLA
- Summary

## **SSIS: Component Types**

- Introduction
- · Synchronous Components
- · Demo: Determine Synchronous **Tasks**
- · Blocking Components
- Summary

#### SSRS: Architecture and Deployment

Introduction

- · Architecture and Deployment
- IIS Configuration
- Deploy a Report
- SSRS Architecture
- Summary

#### **DQS**

- Introduction
- · Intro to Data Quality
- DQS Installation
- Data Quality Client
- Domain Management
- Data Quality Projects
- DQS Administration
- Summary
