

# SharePoint 2010: Enterprise Content Management

page 1

**Meet the expert:** John Underwood is a technical evangelist for a SharePoint consulting company with 30 years of programming experience, including 20 years on the Microsoft platform and 10 years with .NET. John also has extensive experience using, configuring, and programming SharePoint. He is a seasoned instructor with experience in classroom education, online/distance learning, and courseware authoring. John's professional certifications include MCSD for .NET: Enterprise Applications and Microsoft Certified Trainer.

**Prerequisites:** The course is designed for IT professionals and developers that wish to learn more about using SharePoint's document management and collaboration facilities to the fullest. No SharePoint experience is assumed, but some prior exposure is helpful. For the portions of the course that include coding, it is assumed that the audience member is comfortable programming in .NET and using Visual Studio 2010.

**Runtime:** 09:58:05

**Course description:** In this course, you will learn about the content management features found in SharePoint Server 2010. After completing this course, you will have a good understanding of SharePoint 2010 capabilities around sites and site collections, user profiles, search, and information management policies. In addition, you will learn how to extend and customize the SharePoint environment via Business Connectivity Services and InfoPath.

## Course outline:

### Site Collections and Sites

- Introduction
- Site Collections
- Sites
- Terminology
- Demo: Sites and Collections
- Summary

### Collaborating in SharePoint

- Introduction
- Lists
- Document Libraries
- Demo: Lists and Libraries
- Web Pages
- Demo: Web Pages
- Summary

### Site Templates

- Introduction
- Site Templates
- Template Categories
- Demo: Templates
- Portal Templates
- Custom Site Templates
- Commonly-used Templates
- Demo: Common Templates
- Summary

### Publishing Infrastructure

- Introduction
- SharePoint Features
- The Publishing Infrastructure

- Demo: Publishing
- Publishing Portals
- Demo: Publishing Portals
- Summary

### User Profiles

- Introduction
- Collaboration in Enterprise
- Finding Collaborators
- User Profiles
- Profile Properties
- Demo: User Profiles
- User Profiles in Object Model
- Demo: Object Model
- Summary

### My Sites

- Introduction
- My Sites
- Configuring My Sites
- Link to Office Client Apps
- Personalization Links
- Demo: My Sites
- Summary

### Using Profile Data

- Introduction
- Audiences
- Demo: Audiences
- People Search
- Demo: People Search
- Summary

### BCS Architecture

- Introduction

- Business Connectivity Services
- BCS Architecture
- External Content Types
- Demo: BCS
- Summary

### Using BCS Data

- Introduction
- External Lists
- Demo: External Lists
- BCS Web Parts
- Demo: BCS Web Parts
- Programming External Links
- Demo: Programming
- Search and BCS
- Demo: Search and BCS
- Summary

### InfoPath and SharePoint

- Introduction
- InfoPath and SharePoint
- InfoPath Usage in SP 2010
- Custom List Forms
- Demo: InfoPath
- Summary

### InfoPath Libraries

- Introduction
- Drawbacks
- InfoPath and Libraries
- Data Connection Libraries
- Demo: Data Connection Lib

- Form Libraries
- Demo: Form Libraries
- InfoPath Form Web Part
- Demo: Form Web Part
- Summary

### SharePoint 2010 Search

- Introduction
- SharePoint 2010 Search
- Basic Search Center
- Demo: Basic Search Center
- Enterprise Search Center
- Demo: Enterprise Search
- Summary

### Customizing Enterprise Search

- Introduction
- Customizing Enterprise Search
- Site Structure
- Search Web Parts
- Federated Search
- Narrowing Results
- Demo: Customizing Enterprise
- Summary

### Search Optimization

- Introduction
- Reporting
- Keywords
- Demo: Reports and Keywords
- Control Visual Output
- Demo: Visual Output
