Certified Information Systems Auditor CISA, Part 2 of 5: Governance and Management of IT

Meet the expert: As a certified Microsoft Instructor, Ken has focused his career on various security aspects of computer and network technology since the early 1980s. He has offered a wide variety of IT training and high level consulting projects for Fortune 500 companies globally. Through the course of his extensive career, he has taught a full line of Microsoft, CompTIA, Cisco, and other high level IT Security curricula.

Prerequisites: This is Part 2 of the series

Runtime: 03:29:41

Course description: The goal of this course is to address why IT governance is necessary. An IS auditor has to understand and provide assurance to achieve corporate governance for IT and possess the knowledge for evaluating control practices and mechanisms. Eleven tasks will be covered several of which include evaluating effectiveness of IT structure and also human resources management. This course is part of a series covering the ISACA Certified Information Systems Auditor (CISA).
