

Configuring Windows Devices, Part 8 of 8: Managing Desktops and Devices

page 1

Meet the expert: Patrick Loner has certifications for MCSA, MCSE, MCITP, A+, Network+, Security+, and more. He has been working as a Microsoft Certified Trainer, network administrator, and network consultant for over ten years. He has over a decade of experience working with and teaching about Windows networks with client and server operating systems. He has guided many students toward Microsoft and CompTIA certifications. Most recently, he has worked as a freelance trainer and network consultant specializing in Windows Server 2008 and Microsoft Exchange 2007 and Exchange 2010 implementations, design, and upgrades. Patrick continues to branch out now working with and training on Windows Server 2012, Windows 8, Exchange 2013, and System Center Configuration Manager 2012.

Prerequisites: This is part 8 in the series.

Runtime: 01:42:22

Course description: A number of new features have been added to or enhanced with Windows 10. This course discusses group policy and windows 10 devices as well as managing apps. It explains how the enterprise mobility suite works and also how to manage desktop mobile clients. Finally, it closes with managing updates, endpoint protection, and applications. This course is part of the 70-697 exam preparation.
